

NEVADA BUREAU OF MINES AND GEOLOGY
Special Publication L-6
(revised to May 2009 with additional updates Oct 2010/Oct 2011/Jun 2014)

**STATE AND FEDERAL PERMITS REQUIRED IN NEVADA
BEFORE MINING OR MILLING CAN BEGIN**

compiled by DOUG DRIESNER, Nevada Division of Minerals

This is a list of State and Federal permits and actions required during planning, development, construction, and before operation of Nevada mines and mills. We hope it will help both individuals and companies through the complex, often confusing regulatory maze - please understand that not all of these permits are necessarily required for all operations.

Remember that in addition to State and Federal permits, County and City permits may be required. We have attempted to include a general description of County and City permits necessary. As these may vary, it is suggested you contact the local County Planning commission for specific requirements.

This list will be revised periodically, however, the user should be aware that there may be additional, new, or revised regulations issued after this list was compiled. We welcome any additions and/or corrections, as well as any suggestions on how to improve this list. For more information about permitting, contact: Nevada Division of Minerals, 400 W. King Street, Suite 106, Carson City, Nevada 89703, (775) 684-7040 or e-mail to mvisher@govmail.state.nv.us.

CITY/COUNTY REQUIREMENTS

BUILDING PERMIT:..... Many counties require the issuance of a building permit prior to construction of any structure. Cost of the permit may vary depending on extent and type of construction. There must be prior approval for construction from the Nevada State Health Division.

BUSINESS LICENSE:..... Various city/county governments require any firm, person, association or corporation to have a license before engaging in any business activities.

GENERAL PLAN:..... Many counties are governed by a general plan and have adopted special land use ordinances with regard to this general plan. Mining may be allowable in certain areas but not in others, such as agricultural or housing districts.

SPECIAL USE PERMIT: Various counties require special use permits in relation to mining activities. A full description of all phases of the proposed operation is required. Cost of the permit may vary among counties. Public notice is generally required.

ZONING CHANGE: A description of the proposed mining operation is required for a zoning change for industrial use. Often in open use zones, a special use permit may be required. Public notice is generally required.
