OIL AND GAS
Form 15
DECLARATION OF COMPLIANCE WITH NAC 522.260
STRATA SEALED OFF FROM OTHER STRATA

Nevada Administrative Code (NAC) 522.260 states:

1. *During the drilling of any oil or gas well, all strata bearing oil, gas or water above the producing horizon must be sealed or separated in order to prevent their contents from passing into other strata.*
2. *All fresh waters and waters of value or possible value for domestic, commercial or stock purposes must be confined to their respective strata and adequately protected by methods approved by the division. Precautions must be taken in drilling and abandoning wells to guard against any loss of any fresh water from the strata in which it occurs, and the contamination of any fresh water by objectionable water or any oil or gas.*
3. *The operator of any well must shut off and exclude all water from any oil-or gas-bearing stratum to the satisfaction of the division.*

Permit Number	
Well No.	
County	
Company Name	
Field or Area	
Farm or Lease	

In accordance with NAC 522.260, the strata encountered during the drilling of the above listed well have been sealed and isolated with casing and cement, or as otherwise previously approved by the Division of Minerals. Included as evidence of compliance are copies of relevant cement evaluation logs and/or other information and data.

I declare under penalty of perjury that the foregoing is true and correct.
