

NEVADA BUREAU OF MINES AND GEOLOGY
Special Publication L-6
STATE AND FEDERAL PERMITS REQUIRED IN NEVADA
BEFORE MINING OR MILLING CAN BEGIN

Compiled by Lucia M. Patterson and Keith A. Hayes
Nevada Division of Minerals

Updated February 2024

This is a list of State and Federal permits and actions required during planning, development, construction, and before operation of Nevada mines and mills. We hope it will help both individuals and companies through the complex, often confusing regulatory maze - please understand that not all permits are required for all operations.

Remember that in addition to State and Federal permits, County and City permits may be required. We have attempted to include a general description of County and City permits necessary. As these may vary, it is suggested you contact the local County Planning commission for specific requirements.

This list will be revised periodically, however, the user should be aware that there may be additional, new, or revised regulations issued after this list was compiled. We welcome any additions and/or corrections, as well as any suggestions on how to improve this list. For more information about permitting, contact: Nevada Division of Minerals, 400 W. King Street, Suite 106, Carson City, Nevada 89703, (775) 684-7040 or e-mail to ndom@minerals.nv.gov.

When Required The surface management regulations (43 CFR 3809) incorporate three levels of operation:

- 1) Casual use by operator who does negligible disturbance. No notice or plan required. Need not contact BLM. Does not include use of mechanized earth-moving equipment or explosives
- 2) Notice - includes exploration activities that propose disturbance of 5 acres or less. A written notice, including a reclamation cost estimate, must be submitted to the appropriate BLM Field Office 15 days prior to starting operations. A sufficient financial guarantee amount must be approved by and submitted to the BLM prior to the commencement of operations. Effective for 2 years. May be extended for additional 2 years with the submittal of a revised/updated reclamation cost estimate.
- 3) Plan of Operations - includes all mining and processing activities and exploration exceeding 5 acres of disturbance. BLM approves plan.

All Notices and Plans of Operation include a map showing the location of proposed activities and must describe the entire operation, equipment to be used, location of access, support facilities, drill sites, measures to prevent unnecessary degradation, schedule of activities, reclamation cost estimate and reclamation plan. Reclamation is required for all operations. Bonding is required for both Notices and Plans of Operations.

CITY/COUNTY REQUIREMENTS

- BUILDING PERMITMany counties require the issuance of a building permit prior to construction of any structure. Cost of the permit may vary depending on extent and type of construction. There must be prior approval for construction from the Nevada State Health Division.
- BUSINESS LICENSE:Various city/county governments require any firm, person, association or corporation to have a license before engaging in any business activities.
- GENERAL PLAN.....Many counties are governed by a general plan and have adopted special land use ordinances with regard to this general plan. Mining may be allowable in certain areas but not in others, such as agricultural or housing districts.
- SPECIAL USE PERMITVarious counties require special use permits in relation to mining activities. A full description of all phases of the proposed operation is required. Cost of the permit may vary among counties. Public notice is generally required.
- ZONING CHANGEA description of the proposed mining operation is required for a zoning change for industrial use. Often in open use zones, a special use permit may be required. Public notice is generally required.
